SECRET

Journal - Office of Legislative Counsel
Thursday - 14 November 1963

Page 2

25X1 3. [] 25X1A [] NSA called. They
had met with the Senate Internal Security Subcommittee and []
25X1 indicated the session had gone reasonably well. There were very few
questions on the [] case as such and they stated they were not in
fact investigating the case but were attempting to learn security
procedures of various agencies. Apparently there will be another
session on this. They have not yet met again with HCUA and expect
that they will be called some time in the near future.

25X1 4. [] Advised Senator Gaylord Nelson's office
that we would be unable to arrange for the Senator to have lunch here next
week but we will attempt to set something up for a visit during the week
of 25 November.

25X1 5. [] Boyd Crawford, Staff Director of the House
Foreign Affairs Committee, called again with regard to the case of
25X1 [] (Crawford had heard a news program which gave the impression
that four additional Castro prisoners had been executed.) I told Crawford
it was my information that this was merely a recapitulation of the action
previously taken several days ago and did not involve any new executions.
25X1A [] SA3, will keep us informed of any changes in connection
with this case.

I took this opportunity to ask Crawford for his views as to whether
he could suggest members of their Far East Subcommittee who might
be interested in having a young Filipino assigned to them under the
American Political Science Interns Program for foreign nationals. I
advised Crawford that we had such an individual. In going through the
Subcommittee membership, Crawford eliminated practically every member
as being disinterested or being somewhat hostile to the Agency. However,
he did recommend Representative Broomfield as one who might be interested
and also Representative Fraser. (We will discuss this further internally
before proceeding on this.)
